Established in the YEAR 1994

Quality

One Stop Packaging Solution

WE BUILD YOUR BUSINESS WITH CARE

Established in the year 1994, we YNOT Plastics & Packaging is one of the eminent manufacturers and suppliers of extensive range of Plastic Packaging Material. These are manufactured by using superior quality of material bases sourced from reliable vendors of the market to ensure reliability and durability. Our comprehensive gamut of products including Laminated Rolls, Laminated Pouches, PP Woven Sacks, PVC Shrink Sleeves, BOPP Sealking Bags, LDPE Self Lock Bags, LDPE Tamper Proof Courier Bags and many more. These are highly appreciated for their accurate dimensions, elegant designs, alluring colour combinations, water resistance, smooth finish, and longer functional life. Owing to the unique features, these are widely used in varied industries like food & beverage, pharmaceuticals, fertilizers, chemicals, agriculture, cosmetics, etc.

Being a quality conscious company, we pay our special efforts to deliver world-class Industrial Plastic Packaging Materials to our esteemed clients. To maintain the same, we have setup an advanced in-house quality control department that is outfitted with latest machines and tools. The quality control unit is effectively managed by highly qualified and experienced team of quality inspectors, which stringently monitors a complete production process right from procurement of raw material to the final dispatching of the finished and products to the clients.

Under the enlightening guidance of Mr. H. HASSAN (Director), who has attained cohesive and holistic knowledge of the bags, pouches and rolls manufacturing technologies. This smart decision making and vast industries experience has helped us to carve a strong foothold in this competitive market.

Having valuable years of experience, we in offer a wide range of packaging materials which are designed and fabricated in accordance with international quality standards. These are widely acknowledged by our clients for their various unmatched attributes and effectively used for packing any type of material in the best effective manner.

Dry Fruit & Nuts, Idly Dosa Batter Pouches, Snacks & More.

DIGITAL PRINTED POUCHES Without Cylinder

ATTRACTIVE DESIGN

EXCELLENT SEALING

LEAK PROOF

INNOVATIVE AND ATTRACTIVE PACKAGE

LAMINATED ROLLS

Digital printed pouches are flexible packaging solutions that utilize digital printing technology to apply designs, logos, text, and graphics directly onto the surface of the pouches. Unlike traditional printing methods that often require the creation of printing plates or cylinders, digital printing allows for on-demand printing with minimal setup time and costs. Here are some key aspects of digital printed pouches:

- Digital Printing Technology: Digital printing processes, such as inkjet or electrophotography, transfer digital images directly onto the pouch material without the need for intermediate steps like plate-making. This enables high-resolution printing with vibrant colors and intricate details.
- Customization and Variable Data Printing: Digital printing offers the flexibility to print customized designs, variable data, or personalized content on each pouch. This makes it ideal for brands looking to create unique packaging for different product variants, promotions, or seasonal campaigns.
- Short Print Runs and Quick Turnaround: Digital printing is well-suited for short print runs and quick turnaround times. Unlike traditional printing methods that may require lengthy setup times and minimum order quantities, digital printing allows for smaller batch sizes and rapid production, making it ideal for time-sensitive projects or limited-edition products.
- Cost-Effective Prototyping and Testing: Digital printing enables brands to produce prototypes or samples of their pouches cost-effectively. This allows for testing different designs, layouts, or packaging concepts before committing to full-scale production, helping to minimize risks and optimize packaging solutions.
- High-Quality and Consistency: Digital printing technologies deliver high-quality, consistent results batch after batch. This ensures that each printed pouch meets the desired specifications in terms of color accuracy, clarity, and overall print quality.
- Sustainability: Some digital printing technologies use eco-friendly inks and consumables, making them a more sustainable option compared to traditional printing methods. Additionally, digital printing reduces waste by eliminating the need for excess inventory or obsolete printed materials.

Overall, digital printed pouches offer a versatile and cost-effective packaging solution for a wide range of products across various industries, including food and beverage, personal care, pharmaceuticals, and more. Their ability to combine customization, quick turnaround, and high-quality printing makes them a preferred choice for brands looking to differentiate their products on the shelf and connect with consumers through innovative packaging designs.

THE POUCHES ARE OFFERED IN VARIOUS FORMS LIKE:

Standy with zipper / Standy without zipper / Centre seal pouch / Three side seal pouch
Bottom gusset pouch / D' cut pouch / Three finger hole pouch / Spout pouch

FLEXIBLE PACKAGING

PROTECTED FROM ALL EXTERNAL FACTORS

CENTER SEAL POUCHES

Our extensive range of pouches includes center seal pouches. These center seal pouches can withstand high as well as low temperatures. This flexible packaging material is provided with center seal that keeps the packed material safe from air, moisture and other external factors, the exposure to which can hamper the quality of the packed item.

APPLICATION

Coffee, Tea, Biscuits, Chemicals, Consumer Goods and more.

SPOUT POUCH

Spout Pouches are ideal for packing liquid products. These pouches prevent leakage and are puncture-resistant. Ynot Plastics & Packaging lies in manufacturing sturdy and lightweight spout pouches. These are comparatively better than the conventional Bottle-packaging as these are portable and are not fragile.

Why Spout Pouches?

Reclosable Easily Pourable Optimized Cost Improved Aesthetic Appeal Ideal for Liquid Products Convenient than Rigid Packaging

- Leakage-Proof
- Complete Resistance from Rupture
- Availability of Multiple Sizes and Colors (Matte, Glossy and Shiny)
- Available in Different Variants for Different
- Product Requirements
- Customized Printing

FLEXIBLE PACKAGING

INNOVATIVE AND ATTRACTIVE PACKAGE

THREE SIDE SEAL POUCHES

We are offering our clients a wide range of Three Side Seal Pouches. Available in various shapes, sizes and colours, these pouches are sealed from three sides that ensure safe packaging and keep the packed item in its original condition. Moreover, these pouches are leak-proof, which makes them widely demanded in a host of industrial applications.

Some of the application areas of our range of three side seal pouches are mentioned below :

- Various applications from food to industrial grade products
- Ideal for liquid packaging

The pouches are offered in various forms like :

- Zipper Pouch
- Spout Pouch
- Slide Pouch
- Boat Shape Pouch

Zipper pouch with perforation for easy to tear.

COMPOSTABLE CARRY BAGS & SHOPPING BAGS

LDPE / TAMPER PROOF COURIER BAGS

Tamper Resistant Courier Bags for your Shipping needs

We brings you Courier bags made from the best quality material. Helping you to keep your shipments in the best condition, these Poly mailer bags or Courier packing bags are essential for every eCommerce business. Easy to handle and tear-resistant, our courier bags are perfect to ship out lightweight products like fabrics and documents.

The Courier bags come in multiple types and dimensions that fit your specific requirements. Our easy to stick flap is highly secure giving you complete security of what you have enclosed. The tamper-proof courier bags cannot be opened once sealed without having to tear them, making sure that your shipment remains untouched. Its weatherproof material makes it suitable for any type of weather condition that the shipment may have to endure during transit.

Refine your Service with the Multiple Advantages of Courier Delivery Bags

Buy Courier Bags online from our wide range of high-quality bags available in different sizes with and without POD jackets. The Courier bags with PODs are great for eCommerce units to enclose invoices or destination addresses or AWBs. With a self-adhesive system, the POD jackets ensure your shipment reaches the right address without fail.

Our Courier packaging bags are available in various thickness strengths ranging from 51 to 75 microns with a glossy finish. Made from high-quality LDPE plastic, it offers higher impact strength with weather and chemical resistance making it more durable. We offer customization services that allow you to bulk order the Courier bags with the specific design of your brand logo and design.

Order High-quality Courier bags Online from Ynot Plastics & Packaging
Buy the best Courier Bags online from Ynot Plastics & Packaging from a wide variety of choices to match your packing needs. Take your service to the next level with our high-quality courier bags and reduce the hassles in shipping with easy to seal and secure courier bags while keeping it absolutely cost-effective.we are providing high-quality packaging materials for all your shipment and packaging needs that caters to every industry type. We offer assured deliveries of your orders in the shortest time without a hitch in quality.

COMPOSTABLE COURIER BAGS

Compostable Courier bags are fully compostable and biodegradable with world-class certifications. All bags are made from certified compostable raw material that provides high durability and strength. Furthermore, bags are leak-proof, provide breath ability, available in multiple sizes, thickness and patterns. They can be used across a variety of industries.

SECONDARY PACKAGING

INDUSTRIAL PACKAGING

PET STRAP

Our Pet Strap has a high impact resistance that makes it tolerable to adverse conditions. Pet Straps are better able to absorb high shock in handling and transportation, and also can keep load secured more effectively. They have a greater elasticity which is critical advantage in compensating for tension losses. It creates a safer work environment for users because it does not have sharp edges and so there is no risk of injuries while tensioning and cutting the strapping. We are offering Pet Strap in different sizes, thickness and colours. Pet Straps are highly used for metal sheets, rods, coils, cotton, coir, plywood, bricks, textiles, glasses, etc.

LDPE - SHRINK FILM / BAGS

Our LDPE Shrink Film / Bags are extensively used for packing bulk goods. We can offer these shrink films in customized sizes and specifications as per the requirements. Shrink Film is economical in packing, temper evident, prolonging shelf life, total protection, water proof, protection against rain, dust, moisture etc. Our Shrink Film are widely used for packing of carton boxes, bulk water bottles, soft drinks and bulk paper packing, etc.

LLDPE - STRETCH FILMS

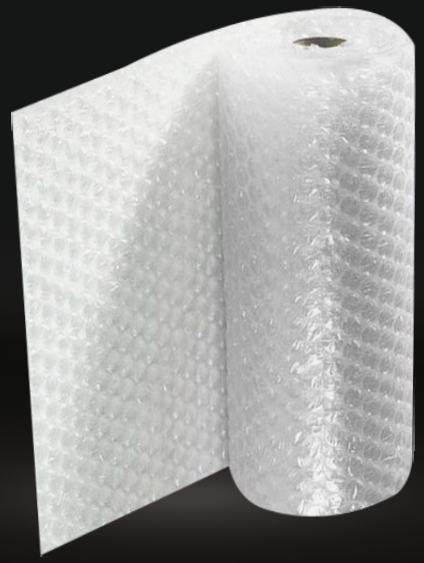

Our high quality stretch films are composed of high elongation, polyethylene based film that is used to utilize and protect products during storage or shipment. It offers added versatility for being able to handle various load types, provide excellent protection, combining small, individual items into larger loads as well as primary packaging material for wrapping individual products. These are available in standard sizes and also can be customized as per client requirements.

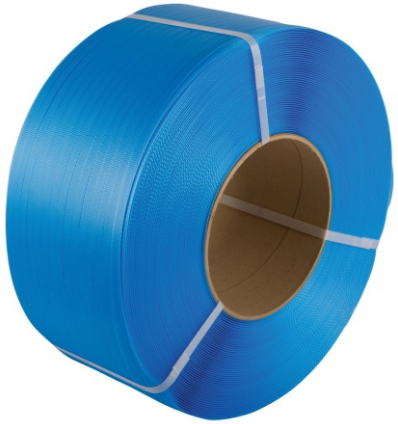

APPLICATION

Wrapping pallets, carton boxes, highly used for export consignment, etc.

SECONDARY PACKAGING

PP STRAP

Our PP Strap comes in different length, width and thickness to suit the requirement of clients. These PP Straps are easy to use, light weight, tear resistant and durable in nature, which provide strong, tight and tough packaging. PP Strap highly used for strapping ceramic products, electric goods, newspapers, medicines, automobiles, glass products, corrugated boxes and other industrial items. PP Strap can be supplied with printing as per the customer's requirement.

DOMESTIC AND INDUSTRIAL

GARBAGE BAGS

We offer wide range of garbage bags made of virgin and recycled material; these are available in different colours, thickness, and size and also as per the customer requirements.

APPLICATION

Storing the wastes in home, hospitals, supermarkets, hotels & industries.
